

Teach Kids the **Right Way** to Write!

- Uses natural weight of the hand
- Allows for focus on guiding rather than forcefully gripping
- Ensures proper “tripod grip” taught in schools
- Fun & easy to use!

Vancouver Coastal Health & Pediatrics have partnered with *Thermor Ltd* for distribution of Rocky Writers (formerly known as Twist n Writes) and PenAgains.

You can order from:

Therapy in a Bin: <http://www.therapyinabin.ca/products/category/handwriting/>

School-Park Inc.: <http://www.schoolpak.com>

The Writing Pen Store: <http://www.thewritingpenstore.com>

The Office Depot: <http://www.officedepot.com>

If you have any questions regarding the use or purchase of Twist 'N Write pencils please contact your Occupational Therapist.

Rockyt Writer Instructions

To Refill

SUPPLIES:

1. 2mm HB lead refills.
2. Paper clip.

STEPS:

1. Make sure there is no lead left in the pencil.
 - a. Find a small hole in the center of the “U” shape part of the pencil.
 - b. Insert the dipstick in the hole to clear remaining bits of led. If you do not have the dipstick you can unfold a paper clip and use the straight edge.
2. Break the lead refill so that it will fit the length of the pencil (~2.25inches)
3. Gently feed the lead in through the pencil tip until you feel it “catch”. It will feel like you are pushing into a spring.
4. Turn the front tip clockwise until only the tip of the led is exposed.
5. Ready to use!
